

## Family Maths Challenges

Thank you to all of our families who have been completing the weekly Family Maths Challenges that have been sent home on a Monday. It has been lovely to see the different ways that the challenges have been completed, and how the children have been able to see and use maths in their everyday lives!

Last year, we were delighted to have been selected to work with the independent charity **National Numeracy** on this exciting project which encourages children and families to do maths together.

As part of the project, we introduced the weekly challenges and have seen how they have helped children and families to explore everyday maths at home together and link maths learning with life outside the classroom.

The most important thing to remember is to have fun! The activities are designed to be completed in a range of ways so feel free to write, draw, create diagrams or take photos. It's up to you!
